

# New International Financial Architecture (Elgar Mini Series) (Vol 1 & v. 2)

This unique collection of seminal articles reflects on the evolution of international finance in the 1990s, exploring the recurrence of financial crises and the resultant policy responses. The editors have brought together groundbreaking academic research addressing the policy decisions made by the key players. In this way, New International Financial Architecture sheds new light on the important debate of the 1990s which started with the Mexican crisis. This authoritative two volume set will provide a great resource for academics, policymakers and private sector participants.

In this course a series of heterodox economic associations based (partly) in be made through one of the mini-conferences or through a research network.
